

Spill Containment Pallets

These Spill Containment Pallets can safely hold 30 or 55 gallon drums. These pallets raise the drums 6" above the floor. Several spill pallets can be linked together to form a total containment system. The pallet is constructed of chemical resistant polyethylene. Other sizes are available per special request.

Features:

Modular spill decks feature bulkhead fittings to connect deck sections. Each deck comes complete with everything you need to use it alone or to connect multiple decks together

Optional revolutionary bladder technology allows for compact design without reducing containment capacity.

Choose from 1-, 2- and 4-drum models

Helps you comply with 40 CFR 264.175 for containment of Hazardous materials

Item #	Description	Length	Width	Height
99341	Poly Plus Spill Pallet 1 Drum	26"	26"	5 3/4"
99341-1	Spill Pallet 1 drum w/ Bladder	30 3/8"	26"	5 3/4"
